Kumulate v2 is the latest generation of the multi-award winning video & content storage management platform. It builds on the same powerful and highly adaptable modular structure, adding new modules (including our recently released Kumulate Gateway & Kumulate Gallery), powerful functionality, and a next-gen, super-sleek interface. New subscription-based pricing models make Kumulate the most flexible, agile storage management solution for video-centric organizations.

## Intuitive new interface

A completely re-designed, next-gen interface for Kumulate modules for a smoother, more intuitive user experience

## New Workflow Orchestrator

Automate workflows with brand new templates, or build your own with simple drag and drop interface

## Enhanced storage locations

New interface & enhanced functionality for easier management of cloud and on-premise storage locations

## Smart Reporting & Analytics

At a glance dashboards give overview of throughput, capacity, performance and failures, plus enhanced reporting functionality.

## Pricing that's as flexible as the solution

Now available via subscription-based pricing

## Support for new Avid environments

Integrates directly into all Avid environments, including Avid Media Central UX

## Enhanced security and file validation

Hash-checking to validate in-transit and at-rest files

## AI & machine learning workflows

Seamless integration of AI & ML services into your workflows

## Significant under-the-hood enhancements

Improved REST API and completely overhauled infrastructure deliver improved performance and seamless 3P integrations
